Education

•Master of Applied Science, Cybersecurity

Sept 2025 – Expected Apr 2027

Simon Fraser University, Burnaby, BC

•Bachelor of Technology, Digital Forensics & Cybersecurity

Sept 2023 – May 2025

British Columbia Institute of Technology, Vancouver, BC

Experience

•Co-op, Information Security

Jun 2026 – Present

Coast Capital Savings

Hybrid, Canada

- Turned complex internal security projects into decision-ready security assessments, exposing threat paths and control gaps to provide clear risk ratings and treatment recommendations.
- Assessed vendor security claims against ISO 27001, SOC 2 Type II, PenTest evidence, and OSINT, delivering risk ratings for management decisions.
- Built audit-ready Archer records that connected source evidence, risk rationale, recommendations, and follow-up actions across BAU and vendor assessments.

•Cybersecurity & DevSecOps Engineer Intern

Feb 2025 – Jul 2025

VibesMeet LLC

Remote, USA

- Moved security checks before merge by wiring Trivy, GitGuardian, and Terraform scanning into GitHub Actions, catching secrets and CVEs across pull requests.
- Closed excessive AWS access paths and embedded least-privilege and MFA into onboarding and offboarding, replacing ad-hoc lifecycle settings with a defensible access process.
- Turned IAM, secrets, and IaC expectations into a release checklist adopted by engineers for production deployments.

•Cybersecurity Analyst Intern

May 2024 – Aug 2024

BCIT Cyber Security Office

Burnaby, BC, Canada

- Raised security-policy quality across 20+ renewals by validating control references against NIST and ISO 27001 before publication.
- Built a virtual investigation environment and authored four playbooks that gave analysts repeatable starting points for incident investigations.
- Built BCIT's awareness program for 1,000+ staff and students, with tabletop exercises showing 15% fewer successful phishing attempts.

Technical Skills

Operations: Firewall, Network/System Security, SIEM (Splunk, Wazuh), Penetration Testing, Incident Response, IOC Analysis, OSINT, MITRE ATT&CK, Burp Suite, Semgrep, Wireshark, CVE, OWASP Top 10

GRC: Threat Modelling, STRIDE, Third-Party Risk, Vendor Due Diligence, NIST CSF, ISO 27001, SOC, Control Testing, Internal Audit, Archer, Jira

DevSecOps: AWS/Azure/GCP, CI/CD Security, IAM, Active Directory, MFA, RBAC, Least Privilege, Zero Trust, Secrets Management, Docker

Automation: Python, IaC, PowerShell/Bash, JavaScript/TypeScript, React, REST APIs, SQL, Git, YAML

Projects

•MCP Security Framework

- Built a Docker-sandboxed scanner to expose MCP-specific attack paths, shipping 14 detectors mapped to CWE, OWASP, and CVSS.
- Tested 60+ MCP servers for prompt injection, tool poisoning, excessive permissions, and credential exposure, retaining HTML and JSONL evidence for review.

•Splunk SOC Lab

- Built detection coverage across Windows Event Logs, Sysmon, and firewall data, translating attack scenarios into SPL detections.
- Tuned correlation rules and thresholds, then documented triage workflows that made investigation steps repeatable.

•2025 TELUS AI Hackathon

- Converted Semgrep findings into AI-assisted false-positive triage and developer-ready remediation guidance.
- Built a dashboard that paired vulnerable code with proposed fixes while retaining human review in the secure-SDLC workflow.

Certifications

Cisco CCNA | CompTIA Security+ | Fortinet NSE 4 | Palo Alto EDU-120 | Google Cybersecurity | CISA (In Progress)
